

Introduction to Generative AI with AWS

Project Documentation Report

Visit [UDACITY Introduction to Generative AI with AWS Project Documentation Report](#) to make a copy of this document.

Complete the answers to the questions below to complete your project report. Create a PDF of the completed document and submit the PDF with your project.

Question	Your answer:
Step 2: Domain Choice What domain did you choose to fine-tune the Meta Llama 2 7B model on? Choices: <ol style="list-style-type: none">1. Financial2. Healthcare3. IT	Healthcare
Step 3: Model Evaluation Section What was the response of the model to your domain-specific input in the model_evaluation.ipynb file?	Genomic characterization is essential for 'generation'
Step 4: Fine-Tuning Section After fine-tuning the model, what was the response of the model to your domain-specific input in the model_finetuning.ipynb file?	Genomic characterization is essential for > [{ 'generated_text': ' the analysis of the genetic basis of complex traits. Genome-wide association studies (GWAS) are commonly used for the identification of genomic regions that influence the phenotypes of interest. In the case of complex traits, such as human diseases, the association signal is generally weak and the'}]
